Bespoke Olive Tree, Ikos Andalusia, Spain.

## WHO ARE WE?

TreeLocate Foliages has been manufacturing and supplying artificial trees, flowers and foliage for over 30 years.

Headquartered in North East England, with an additional manufacturing facility and showroom in Dubai, the company is globally renowned for premium grade products and remarkable realism.

Whether you're looking to add a touch of greenery to your office or create a striking focal point within your hotel foyer, our diverse product range caters to your every need. From small, real-touch orchids,

to soaring palm trees, we provide top-of-the-range greenery solutions for both interior and exterior landscapes.

Our bespoke services and exceptional quality have captured the attention of some of the biggest names in the hospitality and leisure industries, including the Four Seasons Hotels, Emaar Properties, and Majid Al Futtaim.

# UVSilx

COLOURFAST FOLIAGE

UVSilx is internationally renowned for its artificial exterior-grade foliage, specifically engineered for outdoor applications. Its best-in-class ultraviolet protection and resistance to the discolouration caused by intense heat and direct sunlight ensure its enduring vibrancy, even in the extreme climates of the Middle East.

UVSilx is inherently UV-resistant, with the UV inhibitor integrated during the manufacturing process. This inherent resistance makes UVSilx products significantly more resilient against fading compared to sprayed alternatives. UVSilx products are tested to ISO 489-3 and ATSM G154-12a, with official certification available upon request.

Bespoke Olive Trees, Four Seasons Manama, Bahrain.

FireSilx Artificial Plants, Brewdog, United Kingdom.

## FireSilx

FLAME RETARDANT FOLIAGE

FireSilx is a leading brand of commercial-grade fire retardant artificial foliage. Through the infusion of inherently fire-retardant additives into the fabrics and raw materials before assembly, every component is FireSilx products is flame retardant at a molecular level.

Unlike post-sprayed or dipped alternatives, FireSilx fire treatment will not rub or wash off, or leave any greasy residue – ensuring permanent protection, guaranteed for life.

Lab-tested and certified to meet global standards, FireSilx is proven not to ignite, melt, or generate smoke, even under direct exposure to a naked flame. Certifications include BS EN 13501-1, NF P 92-503; M1-M3, DIN 4102-1, and many more, all available upon request.

## NATURAL TRUNK TREES

We exclusively source our natural tree trunks from sustainable farms, repurposing trees that have reached the end of their fruit-bearing lifespan.

Our process starts with kiln drying the trunks to preserve the wood and eliminate any potential infestation. Next, we meticulously handcraft the desired appearance by integrating additional natural branches, expertly concealing the connecting joins. Finally, we adorn the tree with the selected foliage from our wide range of premium options.

The result is a tree preserved for generations, honouring and retaining all the natural characteristics it was born with.

Bespoke Ficus Tree, WoW Porto, Portugal.

## FABRICATED TRUNK TREES

Our fabricated trunk trees are meticulously handcrafted around a robust steel core, enabling them to reach heights of up to 12 metres. The frame is encased in specialised materials that facilitate the carving of the trunk into the desired shape and the addition of any unique features as requested. Then, the structure is covered in hyperrealistic, fire-retardant bark sheeting. Our highly skilled in-house team then meticulously hand-paints the trunk to enhance its lifelike appearance, imbuing it with dimension and character. The result is a museum-grade artificial tree, virtually indistinguishable from its natural counterparts.

Bespoke Ficus Tree & Artificial Plants, Lemmington Hall, United Kingdom.

Artificial Trees, The Tempus, United Kingdom.

Tropical Green Wall, JWI Office, United Arab Emirates.

## ARTIFICIAL GREEN WALL

Our array of artificial green walls delivers the same striking impact as their real counterparts, without the costly installation and maintenance. We carry a wide selection of vibrant artificial foliage and lifelike plants that can be easily mounted onto our green wall frames.

Through our bespoke service, you enjoy complete creative freedom over your green wall's appearance. Specify your desired shape, size, and plant combination to suit your vision. Alternatively, opt for convenience with our wide selection of pre-made panels, available in both fire-retardant and UV-resistant varieties.

Artificial Hedging, Rue Boissiere, France.

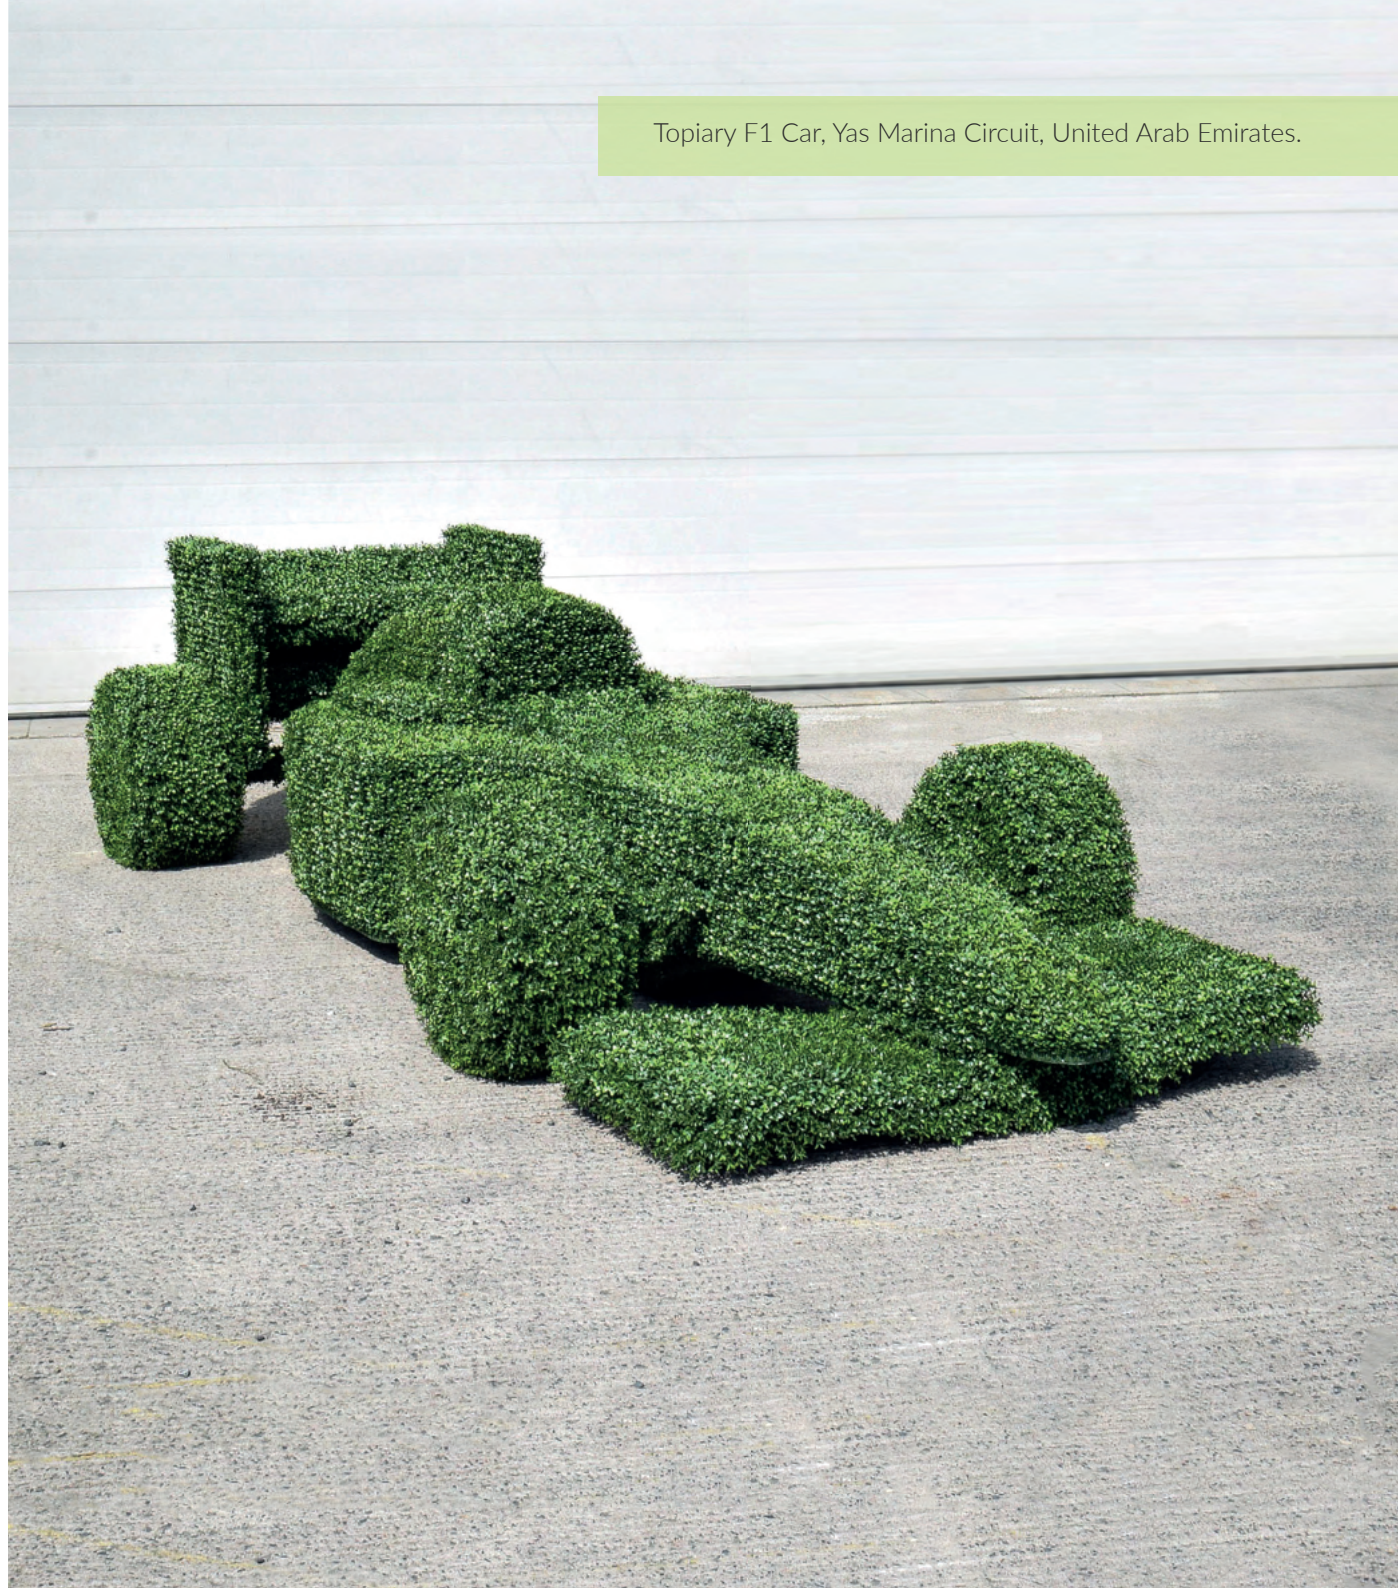

## ARTIFICIAL HEDGING & TOPIARY

In addition to conventional hedging designs, our outstanding artificial hedging and topiary service offers a broad spectrum of creative possibilities.

Specialising in crafting intricate topiary shapes, ranging from impressive replicas of F1 cars to topiary lettering, we work exclusively with the highest quality materials. These materials ensure durability and resilience, capable of withstanding even the most extreme weather conditions.

Meticulously crafted into a robust framework, our topiary creations are built to last. To further enhance their lifelike appearance and provide added protection and longevity, we employ premium FireSilx fire-retardant and UVSilx colourfast matting.

Artificial Date Palm Trees, Booking Office 1869, United Kingdom.

## ARTIFICIAL & PRESERVED PALM TREES

Renowned for their strikingly lifelike appearance, our hybrid artificial and preserved palm trees are crafted with robust steel cores, allowing us to achieve the impressive heights and gracefully curved trunks that define their allure. Additionally, our extensive stock of preserved fronds allows us to recreate a diverse range of palm tree species with precision and artistry.

Unaffected by weather conditions, our exterior-grade palm trees are engineered to endure intense sunlight and cold, damp winters while retaining their charm. For interior installations, our preserved palm fronds offer an exceptional choice, delivering a realistic aesthetic that never fails to impress.

Artificial Plants, Willow, United Kingdom.

## ARTIFICIAL PLANTS & FLOWERS

Crafted to mimic nature with unparalleled accuracy, our extensive offering of artificial foliage has been designed and manufactured to be as lifelike as possible. Botanically accurate and of museum-grade quality, our artificial trees, plants, and foliage require no watering or expensive maintenance, rendering them versatile for installation in any setting, irrespective of lighting or air conditions.

In commercial settings prioritising safety, our FireSilx fire-retardant foliage guarantees both a striking appearance and peace of mind for guests, customers, and staff. Furthermore, for outdoor settings, our colourfast UVSilx foliage remains vibrant for years to come, ensuring enduring visual appeal.
